the bottom line.

*FSN Analysis - Inventory Management Software*

FSN Analysis is an inventory management technique which is based on the rate of consumption of spares and goods in an organization. This analysis divides the inventory into three categories based on their speed or rate of utilization, their consumption rate, and average stay. FSN stands for Fast-moving, Slow-moving, and Non-moving.

## *Importance and Usage*

Also known as the FSN analysis, Fast moving, the slow-moving and non-moving inventory method is about segregating products based on their consumption rate, quantity, and the rate at which the inventory is used. Fast-moving inventory, as the name suggests, comprises the stock that moves quickly and needs to be replenished very often.
