Provides information on the truck and specialty vehicles business, including: automotive industry trends and market research; mergers, acquisitions, globalization; automobile manufacturers; truck makers; makers of specialty vehicles such as RVs; automobile loans, insurance and other financial services; dealerships; and, components manufacturers.

This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development. We have included companies that are making significant investments in research and development via as many disciplines as possible, whether that research is being funded by internal investment, by fees received from clients or by fees collected from government agencies. In this carefully-researched volume, you'll get all of the data you need on the American Engineering & Research Industry, including: engineering market analysis, complete industry basics, trends, research trends, patents, intellectual property, funding, research and development data, growth companies, investments, emerging technologies, CRO, CMO, and more. The book also contains major statistical tables covering everything from total U.S. R&D expenditures to the total number of scientists working in various disciplines, to amount of U.S. government grants for research. In addition, you'll get expertly written profiles of nearly 400 top Engineering and Research firms - the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate profiles include contact names, addresses, Internet addresses, fax numbers, toll-free numbers, plus growth and hiring plans, finances, research, marketing, technology, acquisitions and much more. This book will put the entire Engineering and Research industry in your hands. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

Driving Identities examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies, it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. Driving Identities is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.

Trustees at Work explores the role bankruptcy trustees play in determining who qualifies as a deserving debtor under Canadian personal bankruptcy law. The idea of a deserving debtor is woven throughout bankruptcy law, with debt relief being reserved for those debtors deemed deserving. The legislation and case law invite trustees to assess debtors based on their pre-bankruptcy choices, but in practice, trustees evaluate debtors based on how cooperative the debtors are during bankruptcy proceedings. This book uses interviews and statistical data to explain how the financial and emotional pressures of trustees' work shape their decision-making process.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

Franklin, Jack, Marla, Thaduis, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.
