PROOF MARKS 2403 The proof marks shown below will assist in determining nationality of manufacturers when no other markings are evident. Since the U.S. has no proofing houses (as in England, France, Germany and other European countries), most U.S. manufacturers voluntarily proof their firearms with a specified

PROOF MARKS Proof Marks - National Firearms Museum

Proof marks: After re-inspection and gauging, guns that pass the test - and the vast majority do - are then marked with the London proof mark. Typically, this consists of the initials 'GP' beneath a crown, although there are special marks for unusual tests and circumstances.

The Proof House - Worshipful Company of Gunmakers

Foreign proof marks. Prior to June 1980, there was reciprocal agreement for recognition of certain foreign proof marks, by international accord. At that time the United Kingdom became a signatory member of the International Proof Commission (C.I.P.), Secretariat, at the Belgian Proof House, Liege. Since then the United Kingdom has recognised all the proof marks of the other member nations and, reciprocally, they all recognise UK marks.

Proof Marks - Durham Constabulary

When they were made, all British guns had to be subjected to proof testing (they still are) to ensure that they were fit for purpose. The majority of marks will be found on the barrel flats, though early guns may have stamps on the tubes, under the forend. The table below can be used to see if your gun was proofed in London or Birmingham.

Proof Marks Proof Marks National Firearms

All proof being nitro unless otherwise stated the new service pressure was stated in tons. Only Birmingham used the per " addition and then only until 1984. Where optional metric proof was stamped after 1984 it designated proof rather than service pressure (900/1200kg). London introduced date stamps from 1972. The diamond mark lost its C. 1989 - 2006

London Proof Marks 1813 - 2006

Proof marks are stamps applied to various parts of a weapon during and after manufacture to show that the weapon is safe for use with the ammunition for which it was designed. In England, the London and Birmingham proof houses were established (in 1637 and 1813, respectively) by Royal Charter to protect the public from the sale of unsafe weapons.

Proof Marks - Ballistics - Bev Fitchett's Guns

☐Proof house marks are an evidential provision only. ☐Firearms deactivated by other means (without proof house marks) may no longer fulfil the definition of a firearm and thus no longer require domestic authority to possess/acquire/sell etc. ☐Depending upon when they were deactivated, some weapons are more easily reactivated than others.

Proofreading marks and symbols Although a significant amount of editing and proofreading is now done using tools such as Microsoft's track changes feature and Adobe's commenting tool, you may find yourself faced with traditional proofreading marks and symbols on a printed document someday.

Proofreading marks and symbols | Wordy

In the UK, the most up-to-date BSi standard for UK proofreading marks* is BS 5261C (2005). The marks fall into three broad categories.

The mark of a proofreader - Full Proof

Proof marks. A proof mark is a mark specific to the manufacturer, importer, or testing facility that is performing the test. It generally takes the form of a stamp that makes an impression in the metal. Since proof marks are unique and nearly universal, they are often used to identify the origins of firearms that lack normal manufacturer's markings, such as military weapons, which are often produced by large numbers of different manufacturers.
