Social Adjustment and Personality Development in Children ...

Personality and social development. Several theories of personality development stress that adulthood and aging are periods of qualitative change, of discontinuity, and of transformations of earlier life patterns. These changes are believed to arise in relation to the demands of the person's changing biological status and social context—the family, the workplace, and society in general.

Social Adjustment and Personality Development in Children ...

Social changes are particularly notable as adolescents become more autonomous from their parents, spend more time with peers, and begin exploring romantic relationships and sexuality. Adjustment during adolescence is reflected in identity formation, which often involves a period of exploration followed by commitments to particular identities.
